PROFESSIONAL EXPERIENCE

Mozilla - Outreachy Program
Software Developer Intern
May 2016 - September 2016

Automate Taskcluster Documentation Generation
Taskcluster is a task execution framework that runs automated builds and tests.
- Wrote an npm library that generates a tarball for the libraries and services at Taskcluster which are then published to S3.
- HTML pages are generated through EJS and published on the static site.
- On browser side, the table of content is generated using the tarball.

  tools: Node, Javascript, S3, EJS

Mozilla - Taskcluster Team
Contributor
April 2016 - May 2016

Task Inspector Tool
- Designed and implemented a UI for the task and task-graph inspector tools for users to see their most recent build tasks.

  tools: Javascript, JSX, CSS, React, localStorage
