PROFESSIONAL EXPERIENCE

Mozilla - Outreachy Program
Software Developer Intern
May 2015 - September 2016

Automate Documentation Generation - Taskcluster Team

Taskcluster is a task execution framework that is responsible to run every build and test for Firefox and other Mozilla Projects.

· Implemented the automation of Taskcluster documentation generation.
· Wrote an npm library that generates a tarball for the libraries and services at Taskcluster which are then published to S3
· HTML pages are generated through EJS and published on the static site
· On browser side, the table of content is generated using the tarball

tools: Node, Javascript, S3, Ejs
